Face Your Precious Metals Recycling Challenges

BASF recycles precious metals from spent automotive catalytic converters and chemical catalysts.

BASF supplies best-in-class recovery rates of PGMs from precious metal bearing waste materials. We understand that today’s market is volatile due to a variety of geopolitical, environmental, and regulatory factors. Look to us to support you while you manage your precious metals business and reduce your exposure to metal shortages and fluctuations. Find your peace of mind with BASF!

Transparent Sample Assay
- Critical for the precision that we consider standard
- Depend on our lot integrity and sampling technologies

PGM Analysis Expertise
- Rapid, accurate, and transparent assay results
- ISO-17025 accredited methods

Reliable Trading Expertise
- Cost-effective PGM management
- Facilitate security of supply and help reduce customer risk exposure

Product Stewardship
- Committed to Responsible Health & Safety
- Committed to protecting people and environment
Advantages of BASF Partnership

Proven Experience — We have been in the automotive catalyst market since the very first catalytic converter in 1975

Publicly Traded — Our AAA credit rating is better than most banks

Reputation — Financially secure & legally compliant

Peace of Mind — Our team offers you stability & peace of mind; customers welcome to observe lots

Security — Sophisticated site and procedural security in all areas and aspects of the business

Sustainability — Our practices contribute to a cleaner and stronger future

We Accept:
- Spent AutoCat
- Canned Cat
- Canned CSF
- Unground SUBS
- Unground Beads
- Unground CSF
- Foils/Metallic
- Burnables
- Powders

About Us

BASF’s Catalysts division is the world’s leading supplier of environmental and process catalysts. The group offers exceptional expertise in the development of technologies that protect the air we breathe, produce the fuels that power our world and ensure efficient production of a wide variety of chemicals, plastics and other products, including advanced battery materials. By leveraging our industry-leading R&D platforms, passion for innovation and deep knowledge of precious and base metals, BASF’s Catalysts division develops unique, proprietary solutions that drive customer success.
